

# We Reinvented the Wheel!

## New Edge Guiding System

With our new edge guiding system, the placement of the sleeve is no longer critical. The operator quickly loads the sleeve to the approximate location, the guiding system exactly aligns the edge and eliminates the trim. After hemming and closing, the edges **match** which greatly speeds up the sleeve setting operation as well.

Our new edge guiding system is available as an option on new machines or as a simple retrofit for existing machines and is available for Atlanta Attachment models 211, 211E, 213 and the new 411 Hemmer/Seamer Workstations.

**AAC211**  
Automatic Two-Needle  
Sleeve Hemmer

**AAC211E**  
Automatic Two-Needle  
Sleeve Hemmer

**AAC213**  
Automatic Two-Needle  
Hemming, Sleeves &  
Bottoms

**AAC411**  
Automatic  
Hemmer/Seamer
