SERVICE**

**NEW**

# Automatic Left & Right Zipper Fly

The **Sudden Service Company** now offers a machine to produce both left and right zipper flies automatically. Both flies and the zipper may be roll fed, or one fly can be individually loaded.

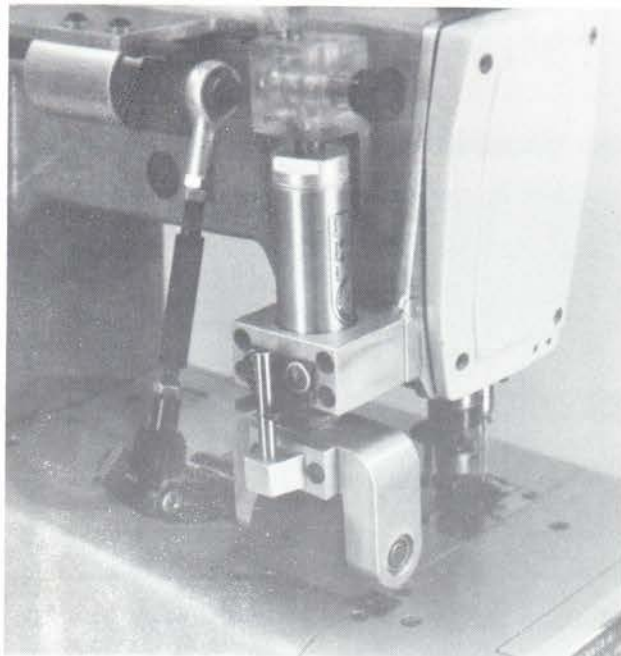

*The advantages are:*

- One automatic unit can usually feed an entire plant.
- Less cost per garment
- Consistent high quality
- Zipper may be purchased on the roll with or without slider and stops
- Less operator skill required

*Call for more information and a sewn sample.*

**ATLANTA ATTACHMENT COMPANY**

401 Industrial Park Drive / Lawrenceville, Ga. 30245 / 404/963-7369 / Telex 261-374 AAC

**Synchronized  
Close-Coupled**

# **PULLERS**

The **SUDDEN SERVICE** Company can retrofit a close-coupled synchronized puller to your machine. (*AP-34 shown.*)

Pullers may be top drive, bottom drive, or both top and bottom, depending on the machine class and operation.

Special rollers are available: steel, rubber, urethane or fiber. They may be diamond knurled, straight knurled, fluted or smooth.

Zero-max style pullers are available.

Call **The SUDDEN SERVICE Company** for more information and all your folder and attachment needs.

# Intermittent Top Shirring For Overlocks

(Patent Pending)

The **SUDDEN SERVICE** Company introduces a new concept in shirring. With our Model 1510 **Intermittent** Top Shirring Device it is now possible to place the ply to be shirred on top!

The advantages are:

- Less repairs
- Better quality
- Increased production
- Installed in less than one hour by your maintenance personnel
- Swings out for threading and machine repair
- Shirring ratio adjustable by operator
- Full speed of sewing head may be utilized
- Detaches in minutes when not needed
- No modification to sewing head
- Available for all overlocks and safety stitch machines
- In stock for most popular machines

*Call The SUDDEN SERVICE Company for all your folder and attachment needs.*

# Automatic Elastic Hemming

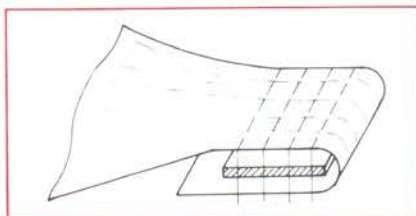

Our unique Spiral Guiding Device completely deskills the difficult tunnel elastic operation.

The operator only has to place the garment against an edge guide and sew.

- Quality and Production are greatly improved.
- Our Spiral Guide may be retrofitted to suitable existing equipment in our factory or your plant.
- Garment must be flat not circular.
- Garments may be butted together to avoid elastic waste.
- Spiral Guide always produces a tight hem around elastic, even on lightweight fabrics with felled seams.

(A)  
Clean  
Finish

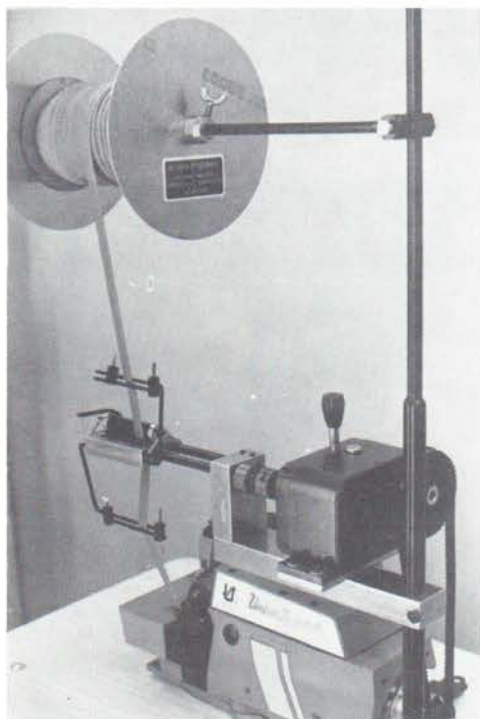

(B)  
Raw-Edge  
Finish

- Difficult fabrics that curl, load easily.
- Available in (A) or (B) type finish (see diagrams at left).
- Write or call for additional information and a sewn sample.

**AP-17**

# ELASTIC METERING DEVICE

The SUDDEN SERVICE Company can supply our AP-17 Upper or AP-18 Lower Metering Device from stock. It can be installed by your maintenance personnel in approximately 30 minutes.

The advantages are:

- Consistent measurements
- Greater production
- Quality garments
- Low cost
- Up to 2½" elastic may be used
- Gear belt drive, no slip
- Available for all machines: overlock, cover stitch, multi-needle, etc.
- Quickly installed or moved to other machines
- Zero-max drive eliminates the over-throw and inconsistent measurements found in clutch-type metering devices
- Maximum speed of the machine may be utilized

**AP-18**

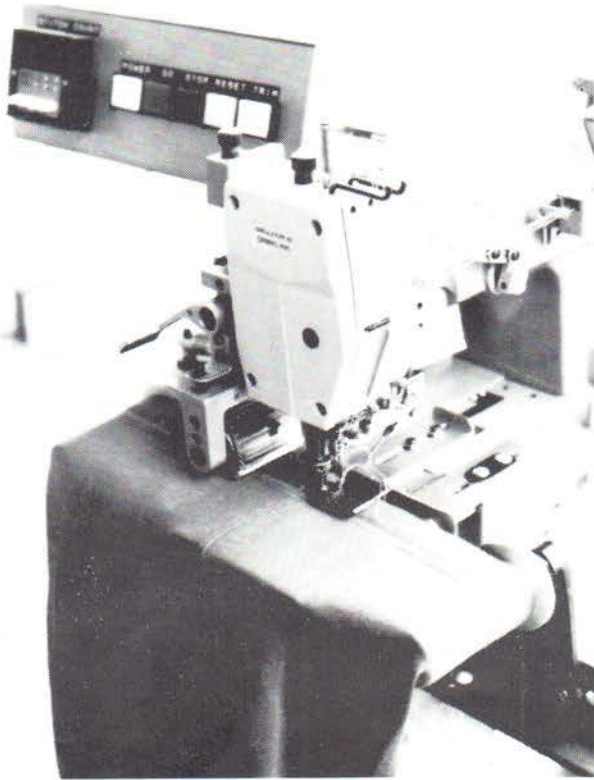

*Call **The SUDDEN SERVICE Company** for more information and all your folder and attachment needs.*

# *Fluid Drive Backwinders*

*With An Automatic Transmission*

- The Fluid-Drive Torque Converter replaces the slip clutch drive and eliminates problems and maintenance.
- The cloth is pulled smoothly, even while stopping and starting.
- The constant torque winds large rolls tightly, allowing more yards per roll.
- The unit is driven by a double groove pulley and v-belt from the motor.
- The viscosity and quantity of the oil determines the torque.
- The sewing head runs cooler on automatic operations.
- Available in all sizes and configurations for your special needs.

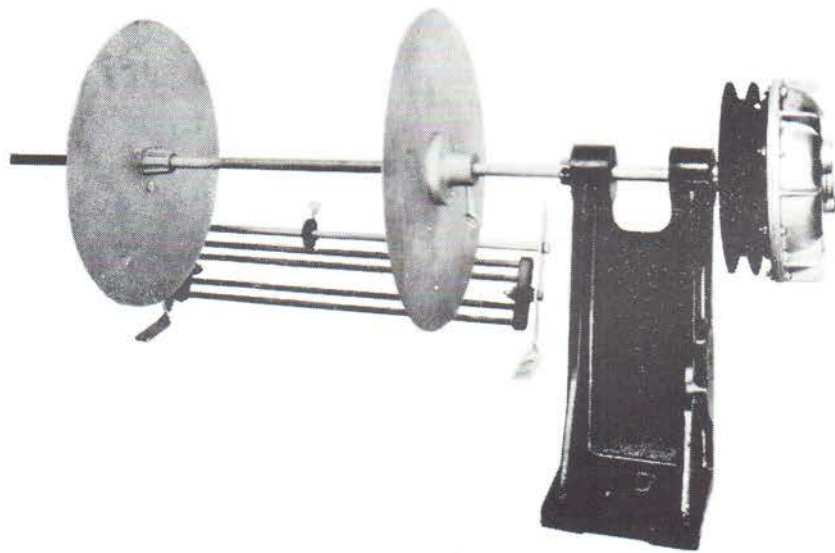

Call **The SUDDEN SERVICE Company** for all your Folder and Attachments needs.

**A-20-10 FLUID DRIVE BACKWINDER**  
For winding the most delicate materials  
**FASTER** without pulling, tearing, curling!

The fluid drive has the conventional vane type construction. However, its internal structure combines the principles of viscous shear with hydro-kinetic power transmission. This gives a high torque capacity at low input speeds. Torque capacity is adjustable by changing the oil quantity, viscosity or specific gravity. Where gradual acceleration is desired, the model A-20-10 applies starting torque gradually for the gentlest of starts.

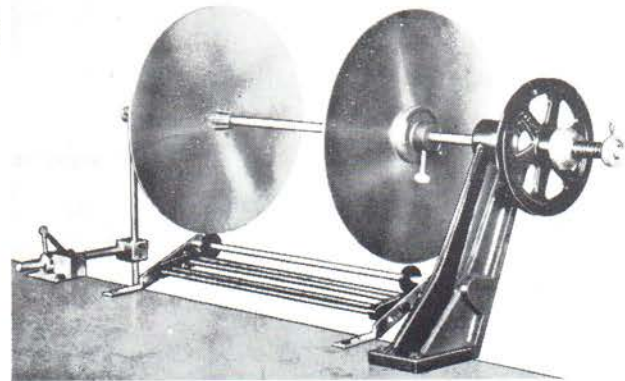

**A-20-5 OVER & UNDER DOUBLE BACKWINDER.**

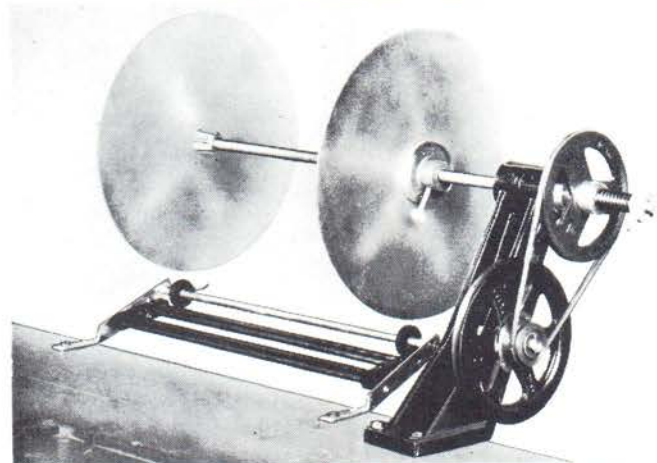

**A-20-3 HEAVY-DUTY BACKWINDER  
FOR WAISTBANDS, ETC.**

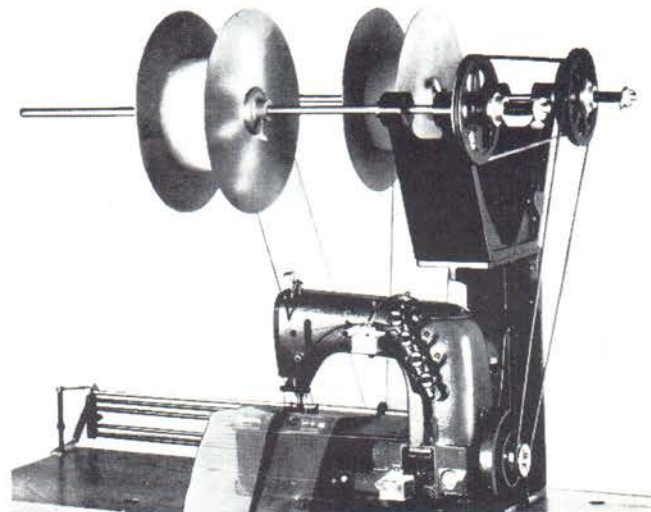

## BACKWINDERS

**A-20-2 BACKWINDER, STANDARD WITH NARROW  
FRAME FOR OVERLOCK MACHINE WITH  
SHAFT END SUPPORT.**

**A-20-6 STANDARD WITH REDUCTION WHEEL  
6 TO 1 RATIO.**

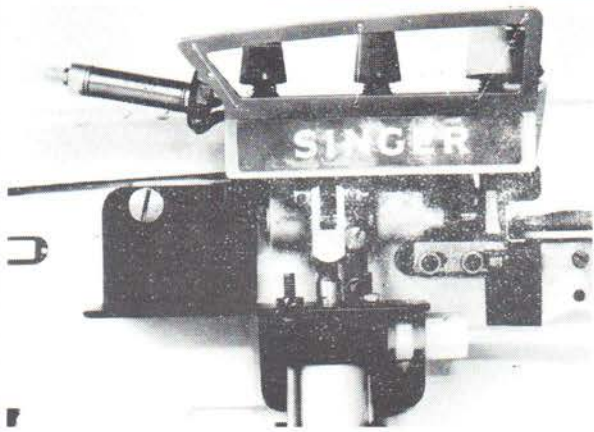

**A-20-4 DOUBLE OVERHEAD BACKWINDER.**

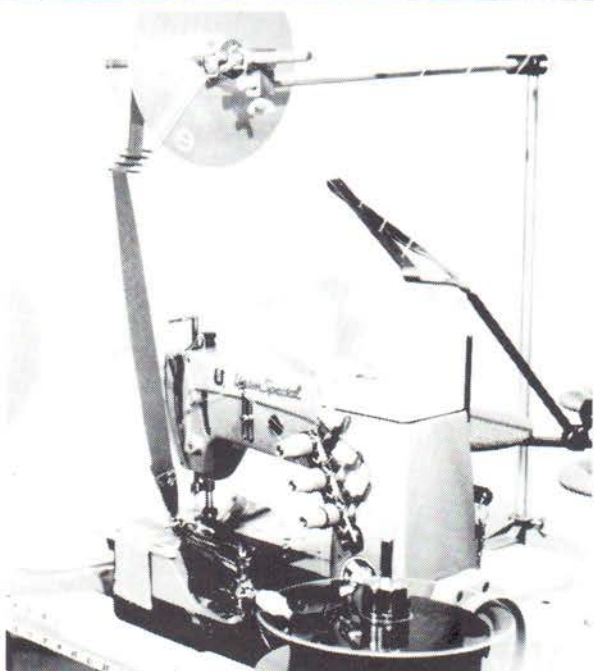

## ATLANTA ATTACHMENT COMPANY

401 INDUSTRIAL PARK DRIVE • LAWRENCEVILLE, GA. 30245 • (404) 963-7369 – TELEX 261-374 AAC

Custom designed **PNEUMATIC FOOT LIFTS** for all machines. Lifts for Puller Roller also available. Delivery: 5-7 days. Please advise machine class.

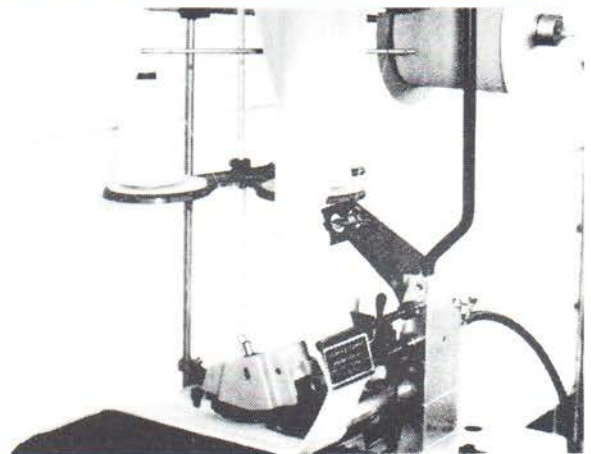

**UNIVERSAL BINDING REELS** with ball bearings clamps to table top, may be moved by operator as needed. Designed for years of trouble-free operation. Available from stock.

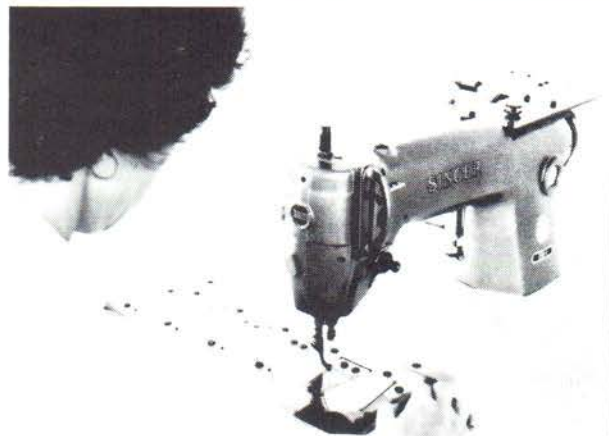

Our **ROW-CAP** attachment is an exact duplicate of Union Special folder or we will custom design a folder to your exact specifications. Delivery: 5-7 days. Advise machine class. Send sewn sample and sew-off material.

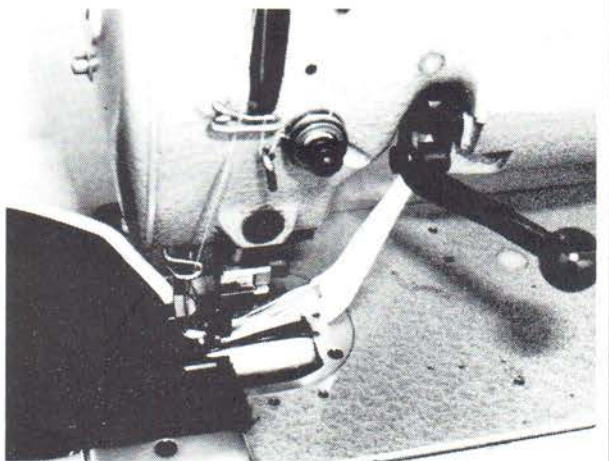

# A T T A C H M E N T S

**AP-22 COLLAR-CUFF METERING DEVICE** dispenses knit binding from a roll to an overlock with the desired amount of tension, or without stretch at all. V-necks, round collars, cuffs, bottom bands. Folder adjusts from 2-10". Improves quality, increases production. Consistant sizing. Reduces the training time required.

**PRO-STITCH™ TEMPLATES** allow an unskilled operator to sew perfect parts first time. Use your sewing head or purchased complete unit with pneumatic foot lift and needle positioner. Low cost templates; no capital investment; short training time. Delivery: 3-5 days. Special presser foot and plate are available. Please advise machine class.

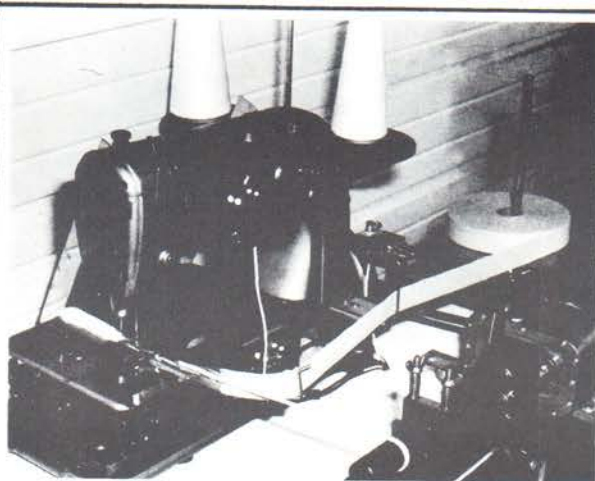

**RIGHT ANGLE BINDER** above is installed on a Durkoff Model 211-7105 Trim Edge and binds in one operation. Knife may be disengaged when not needed. Delivery: 5-7 days. Available for other class machines. Send sew-off material.

## ATLANTA ATTACHMENT COMPANY

401 INDUSTRIAL PARK DRIVE • LAWRENCEVILLE, GA. 30245 • (404) 963-7369 – TELEX 261-374 AAC

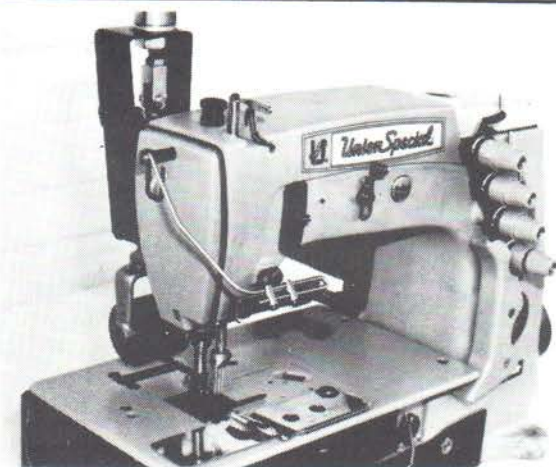

**AUTOMATIC SEWING UNITS** of all types available complete with sewing head. All components in stock, i.e., thread sensors, pullers, binding reels, control box, material controls, transformers, etc.

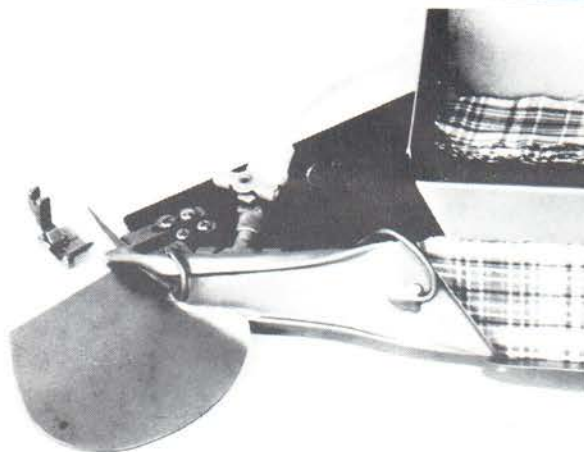

No. 273-4 **COLLAR SETTING & TAPING SYSTEM.** This attachment tapes the collar seam as the collar is set. The operator activates the taping folder at the beginning and deactivates it before reaching the end of the seam. Since the taping does not extend to either end of the seam, the facing can be easily turned and produces a nice corner.

**CLOSE-COUPLED PULLERS** are custom designed and installed on your machine.

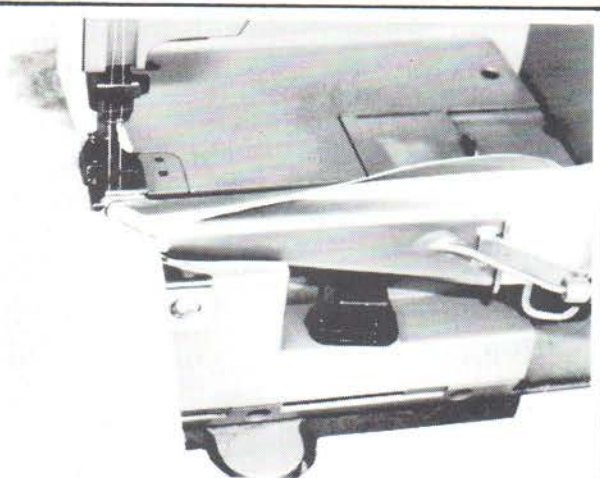

# A T T A C H M E N T S

No. 420-8 **SLEEVE FACING** with "Air-Jet Feed". The Air Jet Feed loads even difficult fabrics easily by pulling the facing into the folder on a cushion of air. Production and quality are greatly improved. Advise machine class. Send sewn sample and sew-off material.

**WALKER BACK-TACKER** eliminates the need for separate tack or trimming. Thousands in use for more than 25 years. Available from stock for all overlocks. Installs in 10 minutes. Low cost - low maintenance.

No. 191-8 **COLLARETTE** with "Air-Jet Feed" to eliminate pucker. Open top feature allows binding which has been cut too wide to be used and still produce the same size and quality finish. Patent Pending.

# **TENSION** Got You Down?

## Relax The Atlanta Attachment Way...

### **Electric Rewinding Machine**

- Capacity up to 6" width A20-7.
- Capacity up to 12" width A20-8.
- Geared Chain Drive completely enclosed.
- Electric Speed Control.
- Special High Torque Motor.
- Self Contained, completely portable.
- 110 Volt or 220 Volt.
- Move from one rewinding job to another, unplug and go.
- Lightweight – only 29 lbs.
- Available with yardage counter or other accessories.
- Wind stretchy goods without tension, therefore, no distortion.
- May be inter-connected to automatic equipment.
- Unit available mounted on casters.
- Ideal for rewinding waistbands, elastic, braid, lace, etc.
- Size: 12" wide, 16" high, 24" long.
- Operates Independently. Works with any type of sewing machine.

### **Walker Tape Feeder**

The Walker Tape Feeder is a dispensing device for all types of zipper chain, lace, elastic or other trims.

The tape feeder unit keeps slack in trim and delivers it to the sewing machine in a relaxed condition. This eliminates inconsistent measurements for garments with elastic and increases production because there is no wasted trim or time. So, stop worrying about *YOUR* problems and start using *OUR* solution.

Call or write today for more information on the time-tested (25 years), dependable **WALKER TAPE FEEDER**.

Adaptable to all sewing machines.  
(Available in 110 Volt or 220 Volt.)

# Why Waste Time and Money . . . when we have the Attachments to save you both!

V-NECKS, ROUND COLLARS, BOTTOM BANDS, CUFFS, ETC., CAN BE ATTACHED WITH OUR **AP-22 VARIABLE SPEED METERING DEVICE**.

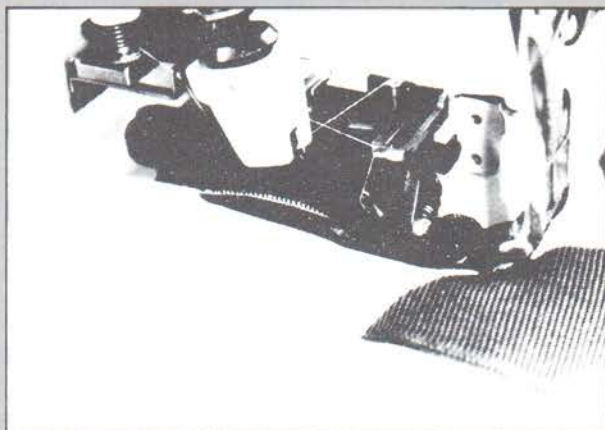

Our Attachment dispenses collar, cuff or bottom band tape to an overlock machine from a **roll** with the desired tension, or without any tension at all.

- \* "V"-neck shirts with **both** shoulders closed, label and collar set in one operation.
- \* Sweetheart collars with **both** shoulders closed, label and collar set in one operation.
- \* Round collar shirts with **one** shoulder open, label and collar set in one operation.
- \* Adjustable Folder accepts rolls cut 2"-10". Eliminates waste (cut too narrow, cut too wide).
- \* Cuff - collar measurements consistent.
- \* Swings out for machine threading and maintenance.
- \* Installs in 45 minutes on any overlock.
- \* Training time reduced.
- \* Improves quality of garment.
- \* Low purchase price—Quick pay-back.

— CONTACT US TO RECEIVE A **SEWN** SAMPLE —

With our **No. 273-4 COLLAR SETTING AND TAPING SYSTEM**, the seam on a placket-front shirt with full fashion collar is

automatically taped as the collar is set, adding no additional cost to this operation.

The facings can be turned easily, without bulkiness, since the tape does not extend to the ends.

Fits all overlock machines universally.

Special presser foot\* with roller is available for all overlocks to insure positive start of taping.

Our System improves the merchandising of your shirts and adds that finished look.

# LEVEL~WIND WINDER

When lace, elastic, ric-rac, piping or any other trim has to be rewound on spools, the Atlanta Attachment Company Level-wind quickly fills this need.

Available with pre-set yardage counter, the winder stops when the pre-determined number of yards is reached.

The winder may be connected in series with any automatic machine to rewind trims after sewing.

The Level-wind is self-powered and may be operated independently of other equipment. It is portable and may easily be moved from one area to another.

It allows trims to be purchased in larger quantities, rewound and then be shipped to contract or satellite plants.

The Level-wind Winder is in stock now to insure immediate delivery.

# Sometimes Tacking Can Be Fun, But It's Always Expensive

To enjoy *this* tack, eliminate *this* tack by using the Walker Back Tacker.

As a seam is finished, the overlock chain is cut and held by the back tacker. The chain is then automatically sewn into the next seam, eliminating the need for it to be trimmed or the seam to be tacked.

The Walker Back Tacker is available, at a low price, for all overlocks from stock.

Contact us, the "Sudden Service" Company, for more information on how you can save expensive time with the cost-cutting WALKER BACK TACKER.
