HSView
## Live Inventory Management

Why RFID?

- Increased visibility and more efficient management of inventory, including; raw material, in-process and finished goods.

- Improved accuracy in inventory management, production, and overall operation.

- Reduction in labor cost, both direct and administrative.

- **HSView** tags are more durable versus traditional labeling because tags can be placed inside unit.

- **HSView** tags do not have to be visible to scan.

- **HSView** tags can store more data than traditional bar coding.

Choose Your Level of Service!

Hardware Pre-Installed on New Equipment or Retrofit to Existing

Purchase your **Atlanta Attachment** equipment pre-installed to enable process tracking, replenishment alerts and quality control tracking automatically or retrofit your existing facility.

Hardware, Software and Installation

Regardless of which services and products you choose, the **HSView** System is built on one of the longest running RFID platforms in the industry. At any point you can take control to customize the system for optimal use and flow as self-operated or turnkey managed.

Innerspring or Foam Components Pre-tagged

Your **HSM** supply locations can manage RFID tagging, encoding and data management for your tracking and replenishment purposes without any changes to your operation

HSM Managed Services

Customers have an option to lease a turnkey operation monthly or as part of their contract and avoid software installation, hardware setup, system support and maintenance.
